**fuse:** 10 A max (determined by the module load current), fast blow  
**pre-act:** pre-actuator

**NOTE:** There is only one group of 16 outputs. All common 24 V are internally connected and all common 0V are also internally connected. The two pins of a same input (e. g. pin 1 and 2 for input 1) are internally connected too so that you can use either the right pin or the left one.
